PROFESSIONAL SUMMARY

Results-driven AI/ML Engineer with hands-on experience building data-driven applications, developing predictive models, and deploying end-to-end machine learning systems. Demonstrated proficiency in deep learning, computer vision, NLP, and LLM-based agentic systems. **Achieved GATE 2025 score of 307 (AIR 12,031 / 57,054 candidates) in Data Science & AI — IIT Roorkee.** Passionate about leveraging cutting-edge AI to solve real-world problems and drive data-informed decision-making.

TECHNICAL SKILLS

Programming	Python
ML & Data Analysis	NumPy, Pandas, Scikit-learn, XGBoost, LightGBM, SciPy, Matplotlib, Seaborn
Deep Learning	TensorFlow, PyTorch, Keras
Computer Vision	OpenCV, YOLO, Haar Cascade
NLP	SpaCy, NLTK, Hugging Face Transformers
LLMs & GenAI	GPT-3/4, LLaMA 3, Gemini, Mistral-7B, BERT, LangChain, LangGraph, CrewAI, AutoGen
Web & APIs	FastAPI, Flask, Streamlit
MLOps / LLMops	MLflow, LangGraph, GitHub Actions, Azure ML Pipelines
Database & Tools	MySQL, Git, GitHub, VS Code, Jupyter Notebook

EXPERIENCE

Associate — **Intellativ India Pvt Ltd** | 2nd Feb 2026 – Present

Project: Hiring Intelligence & ATS Automation Platform

- ▶ Built an end-to-end recruitment platform covering resume parsing, ATS scoring, and candidate pipeline management — supporting PDF, DOCX, and scanned image resumes via Groq LLaMA-3.3-70b, Tesseract OCR, and NLP-based fallback mechanisms.
- ▶ Designed scalable backend services using FastAPI, async SQLAlchemy, and PostgreSQL with Dockerized microservices; implemented ATS matching and candidate ranking through semantic similarity scoring, keyword extraction, and GenAI-driven evaluation workflows.
- ▶ Contributed to a React + Vite recruiter dashboard for candidate workflows and resume visualization; set up CI/CD pipelines via GitHub Actions with deployment on DigitalOcean using Docker and NGINX.

PROJECTS

Multilingual Financial Document Q&A Platform (RAG) | Gemini 2.0 · LangChain · Pinecone · Streamlit

- ▶ Designed a RAG-powered financial document analysis tool using Gemini 2.0 + LangChain + Pinecone to summarize Indian Budget PDFs, with multilingual support across English and 10 Indian languages via SpeechRecognition, gTTS, and Deep Translator.
- ▶ Built an intuitive Streamlit interface enabling PDF upload, intelligent Q&A, voice-based interactions, and transparent source citation for user trust and accessibility.

Agentic Travel Itinerary Planner | LangGraph · Groq · LLaMA 3.1

- ▶ Engineered a multi-step agentic travel planner using LangGraph and Groq LLaMA-3.1 with specialized nodes for user profile analysis, hotel/place recommendations, cost estimation, and itinerary generation with controlled, multi-hop reasoning.
- ▶ Implemented a StateGraph orchestration pipeline to ensure modular processing, reduce hallucinations, and produce consistent, personalized travel summaries.

EDUCATION

B.Tech in Electrical Engineering — Biju Patnaik University of Technology, Odisha | **2018 – 2022**

CGPA: 8.99 / 10 (84.99%)

Class XII – Science (PCMS) — Newton College of +2 Science | **2018**

Percentage: 75.16%

Class X — K.C.P. Panchayat High School, Giringkela | **2016**

Percentage: 81.33%

CERTIFICATIONS & TRAINING

Data Science & Artificial Intelligence — Naresh i Technologies (2025)

Coursework: Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI

GATE 2025 Preparation – Data Science & AI — Made Easy (2024)

Focus: Linear Algebra, Calculus, Probability, Algorithms, Data Structures, ML & AI

LANGUAGES

English • Hindi • Odia
